

**Not much has happened
to the flying disc
since a bunch of
college kids threw some
pie plates around.**

AMF Voit Re-Invent

AMF Voit, a world leader in sporting goods equipment, introduces its latest line — the AMF Voit Vector® Sport Discs.

Now, AMF Voit offers a comprehensive line of flying discs, engineered for both novices and experts.

The AMF Voit Vector Sport Discs represent a major

Check out these innovations:

- Thinner flight plate allows the disc to float longer.
- Maximum weight displacement to the outside rim for longer, smoother flights and less "turn over," even when playing in the wind.
- Textured grip-ring is most aerodynamic and non-slip grip ever produced.
- An improved, completely smooth undersurface for unimpaired freestyle play.
- Shoulder taper aerodynamically designed for greater flight stability and hovering potential.

Unique Two Piece Discs

Designed for Freestyling

The unique two-piece Vector Sport Discs feature patented engineering characteristics that make flying a breeze. Super-smooth undersurface make them especially adaptable to freestyle maneuvers.

Comes in three different diameters and weights.

Hot-stamped in copper, silver and amber.

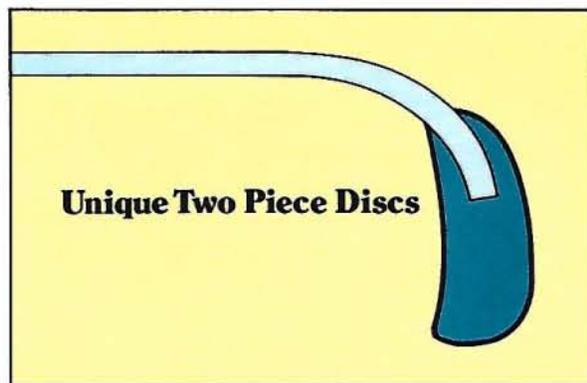

AMF Voit Vector Sport Discs — Two Piece

28:75F — 28 centimeters, 175 grams

27:45F — 27 centimeters, 145 grams

25:35F — 25 centimeters, 135 grams

Packaged in the innovative and colorful hexagonal carton.

The Flying Disc...

...that for the past 50 years, takes to the skies to launch

discs with models scientifically designed and

representing a breakthrough in the evolution of the flying disc.

- Some models injected with nightglow that not only illuminates the disc, but, gram for gram, stabilizes it better than conventional pigments.
- Colorful center plate graphics—both full color decals and hot stamp.
- Unique model numbering system makes it easy to tell the size, weight and recommended use of each disc.
- State-of-the-art hexagonal packaging designed to protect the disc against damage. Also great for displaying collector's discs.

Our One Piece Discs

A model for every sport

Our one-piece Vector Sport Discs line includes a model for every sports event in the ever growing world of disc competition. Check out these high performance models.

28:70U — For Ultimate Enthusiasts

The biggest one-piece Vector Sport Disc developed for the Ultimate player. 170 grams of aerodynamic engineering for the team sport of Ultimate.

Its stability also makes the 28:70U a favorite among freestylers.

Colorful center plate graphics tell Ultimate players that this disc was made for them.

24:20D Model

Engineered for distance. 120 grams calculated to fly farther and more smoothly.

Full-color landscape decal.

23:00M Model

Stays aloft longer because its 100 grams are the lightest in the line.

Designed for "Maximum Time Aloft," the 23:00M incorporates aerodynamic principles for added lift. Great for the beach or the wide open spaces.

Made of tough, polyethelene plastic. Full-color action decal. Exclusive hexagonal carton.

K-9 — The AMF Voit Vector Sport Disc Designed Just for Man's Best Friend

Constructed of tough polypropylene to withstand the fangs of any size dog. Stands up to bite after bite. 9-inch lightweight disc right size for all kinds of dogs. Colorful silk-screened center plate design.

Unique Packaging

State-of-the-art hexagonal packaging designed to protect the disc against damage. Also great for displaying collector's discs.
