

OH-OH, OREGON

Biggest cause celebre in the state of Oregon for many a moon was the flap which resulted when the University of Oregon succumbed to public pressure and removed credit from a one-hour course

entitled "Frisbee Techniques and Spatial Implications."

An ad hoc committee, "Frisbee 15, 351," organized a protest demonstration to which University president Robert Clark was invited. A prior commitment precluded his attendance, but Clark was ably represented by his administrative assistant, Gerald Bogen.

Bogen not only attended; he also joined with the Frisbee fanatics, demonstrating excellent form (see photo). As a matter of fact, the university official expressed some concern for the ability of the demonstrators, describing himself as "disappointed in the general competence of the group."

President Clark indicated that should another demonstration be scheduled he would attend, then amended that to say he would come if he didn't have a prior commitment.

More than 200 students took part in the demonstration which was unsuccessful insofar as bringing credit back to the course, but which helped develop increased rapport between students and faculty.
