Coming Up!

Wednesday, August 2, **7:30 pm.** (new time). Monthly club meeting at Picasso's Pizza 1004 South Kings Drive.

Saturday, August 5, **10:00 am.** (new time). Monthly fund raiser at Latta Park. The two round event starts at noon, get there by 9:30 to sign up. Entry fee is $5.00, all proceeds go to the Pole Hole Fund.

Friday, August 4, 1989 is the ten year anniversary of the first (Frisbee®) disc golf tournament held in Latta Park. For the monthly fund raiser, the original object course will be set up for the first round of the tournament. Ten years ago, we played with "light plastic". These Frisbees including Regulars®, Superpros®, Fast Backs®, Masters®, and the World Class® series. They were the only locally available discs. You are challenged to play the first round with the one of your choice.

Going Down!

July 14, 15 & 16, Laurel Springs, NC. The first PDGA Amateur National Championships was won by J. Gary Dropcho of Pittsburgh, Pa. with a total score of 238. CFC members were as follows:

(Advanced)			(Amateur)		
2.	Matt Wachowiak	241	16.	Joel McRae	271
3.	Sam Nicholson	243	20.	George Miranda	273
8.	Tim Hogg	253	23.	Jeff Carder	275
13.	Brett Fowler	261	35.	Nick Miranda	288
			40.	Kelly Brower	293

The Pole Hole Fund

Your $10.00 CFC membership fee goes directly to the Pole Hole fund and your membership is good for a lifetime, however, annual contributions of $10.00 would be appreciated by all. If the date on your mailing label is 8/88, it's time for you to dig DEEP (catch the underlying meaning here?). Donations will be accepted at any club function.

Useful information

A family of owls has repeatedly nested and produced offspring in Latta Park for the past 4-5 years. (at least that's how long I have noticed them) For that reason, it was suggested that we adopt the owl as our mascot. There were no strong objections and everyone seemed to agree on this idea at one monthly meeting last winter.

With the aid of a Peterson Field Guide To Birds, I have identified them as the **BARRED OWL**, so named for the vertical bar like coloring of the breast feathers. It is a large gray-brown, puffy headed owl with brown eyes. It stands 17-24". Pairs mate for a lifetime producing 2-3 offspring each year. They range from Canada (east of the Rockies) to Honduras. They habitat woodlands, wooded river bottoms and swamps. Let's assume that they eat Radl snakes among other vermin.

THE OWL AND THE RADL SNAKE
by GOOBWARD LEAR

The Owl and the Radl snake went to golf
In a beautiful oak tree lot,
They took there best drives, and sent them aloft,
With hopes of an easy next shot.
The Owl looked at the score after eighteen
And sang for what it had seen,
'O lowly Radl! O Radl, my foe,
It appears that your putt was too low.'
